

This lunch seminar is eligible for one AIA Continuing Education Unit (CEU), one (HSW), or one IDCEC. This course is a combined educational presentation about terrazzo and seamless flooring. Resinous terrazzo, precast terrazzo and seamless flooring industries are mature and rapidly growing markets. Today's architects/designers are increasingly incorporating both of these materials, terrazzo and seamless, in combination to assist in budget and schedule of today's building projects.

The following topics will be covered:

- Evolution of Resinous Terrazzo
- Terrazzo Installation Review
- Health Safety Welfare Benefits of Terrazzo
- Design Elements: Precast Stairs/Base & Logo's
- Design Flexibility of Terrazzo
- Seamless Floor Options

Advantages of Terrazzo, Precast and Seamless Flooring:

- Extremely Durable & Sustainable
- Seamless
- Low Maintenance Cost
- Unlimited Design Capabilities
- LEED Friendly
- Resist Growth of Mold, Fungus & Bacteria

Presenter:

Barclay Pierce  
Architectural Sales Consultant

Course Title:

Resinous Flooring and Terrazzo

Course Number:

RFT-22
